PROFESSIONAL SUMMARY

A Business Information Systems student and Full-Stack Web Developer passionate about continuous growth and learning new technologies. Experienced in building web applications using the Laravel, Express.js, and Angular frameworks, as well as designing database architectures and API middleware. I also have experience implementing Micro frontend Architecture (MFA) and Module Federation to design modular systems. I am committed to continuous learning, adapting, and making meaningful contributions to the software development team.

EXPERIENCE

Backend Developer Intern

UPA TIK Politeknik Negeri Malang · Malang, Indonesia

February 2025 – June 2025

- Designing databases and developing APIs that serve as middleware to ensure smooth and secure data communication between systems.
- Developing comprehensive CRUD (Create, Read, Update, Delete) features on the admin dashboard to streamline data and content management workflows.

Full Stack Developer Intern

PT. Amerta Indah Otsuka · Pasuruan, Indonesia

July 2025 – January 2026

- Implementing a Microfrontend Architecture (MFA) to integrate various standalone applications into a single centralized platform ecosystem.
- Develop and integrate APIs, build new features, and proactively debug to ensure the stability and performance of the application.
- Redesigning the user interface (frontend) to create a more modern, responsive, and user-friendly visual experience.
- Gain hands-on experience by setting up CI/CD to streamline the automated software deployment process.

EDUCATION

State Polytechnic of Malang

2022 - Present

Bachelor of Applied Science in Business Information Systems

SKILLS

- **Programming:** Java, JavaScript, Typescript, PHP, MYSQL.
- **Frameworks:** Express, Angular, Laravel, Module Federation, Node.js, Bootstrap.
- **Tools & Cloud:** Git, Github, Gitlab, CI/CD.
