PROFESSIONAL SUMMARY

Business Information Systems student and Full-Stack Web Developer passionate about continuous growth and learning new technologies. Experienced in building web applications using Laravel, Express.js, and Angular frameworks, as well as designing database architectures and API middleware. Skilled in implementing Micro Frontend Architecture (MFA) and Module Federation to design modular systems. Committed to continuous learning, adapting, and making meaningful contributions to the software development team.

EXPERIENCE

Full Stack Developer Intern

July 2025 - January 2026

PT. Amerta Indah Otsuka, Pasuruan

- Implemented a Microfrontend Architecture (MFA) to integrate various standalone applications into a single centralized platform ecosystem.
- Developed and integrated APIs, built new features, and proactively debugged to ensure the stability and performance of the application.
- Redesigned the user interface (frontend) to create a more modern, responsive, and user-friendly visual experience.
- Gained hands-on experience setting up CI/CD to streamline the automated software deployment process.

Backend Developer Intern

February 2025 - June 2025

UPA TIK Politeknik Negeri Malang, Malang

- Designed databases and developed APIs that serve as middleware to ensure smooth and secure data communication between systems.
- Developed comprehensive CRUD (Create, Read, Update, Delete) features on the admin dashboard to streamline data and content management workflows.

EDUCATION

Bachelor of Applied Science in Business Information Systems

2022 - Present

State Polytechnic of Malang (Politeknik Negeri Malang)

SKILLS

Programming: Java, JavaScript, TypeScript, PHP, MySQL

Frameworks: Express.js, Angular, Laravel, Module Federation, Node.js, Bootstrap

Tools & Cloud: Git, GitHub, GitLab, CI/CD

PROJECTS

HR Club Pasuruan

- Landing page and application system for a human resource organization in Pasuruan, managing human resources, company data, and membership dues. Built with Angular and Express.

SIMHAQ (Qur'an Memorization Monitoring System)

- Web-based information system for monitoring Qur'an memorization progress, featuring interactive learning material management based on the VARK learning style approach and a real-time monitoring dashboard. Built with Angular, Node.js/Express, and PWA implementation.

Techtalk

- Internal knowledge management and sharing platform enabling creation and management of structured technical articles, discussion via comments, troubleshooting guides, and knowledge-sharing session scheduling. Built with Angular and Node.js/Express.

Samosy

- Inventory management application for centrally recording, monitoring, and managing inventory data (raw materials, equipment, packaging, finished goods), including transaction processing and reporting. Built with Angular (frontend) and Express.js (backend).

PPID Polinema

- Information system for managing and documenting public information in a centralized, transparent, and efficient manner. Built with Laravel and MySQL.

Kompen Information System

- Web-based application for digitizing the management and tracking of student attendance compensation within the Information Technology Department. Built with Laravel and MySQL.

Polinema Web Customer Satisfaction Survey

- Web-based information system for digitizing collection and management of user feedback. Built with HTML, PHP, JavaScript, and MySQL.
